# ZAXIS 370LCH GI-series hydraulic excavator launched

on the operators comfort, safety and ergonomics.

ZAXIS GI-series has features such as on board ICX (Data Controller) and Global e- service, enabling data downloads, machine location identification and machine maintenance and performance monitoring by the customer. In ad-

dition to this, features such as Auto Idle, Power Modes, Work Modes and longer change intervals of consumables will help the customers achieve significant savings in operating costs. ZAXIS 370LCH also goes green, through its environment friendly engine, conforming to US EPS Tier 2 and European EC

Tier 2 standards, consuming optimum fuel as per the work requirement.

Sandeep Singh, Managing Director of Tata Hitachi said, "With the launch of this new model, we have fortified our presence in the Granite and Marble, Blue metal handling and bulk excavation segments in In-

dia. The production and rollout of ZAXIS 370LCH will mark the beginning of a new era for us as it will cater to the Indian as well as the global construction equipment markets through exports. We are happy that there has been high enquiry level and order booking for this machine already."
