

# Tata Hitachi launches TH76 Excavator Loader

INDORE: That Hitachi's TH76 'Versatile' Excavator Loader was launched on Saturday at Indore in the presence of a distinguished gathering of customers and Tata Hitachi officials. The large audience attending the event which was held at the Radisson Blu Hotel appreciated the novel features and offerings of the new product. The TH76 is now rolling out of Tata Hitachi's plant at Dharwad,, Karnataka, which is one of the first state-of-the art as-

sembly line manufacturing facilities in India.

The TH76 are a break-away from the Backhoe loaders available in the market. These machines come with all the common customer benefits.

The TH76 is a versatile machine which offers the customers all the benefits plus flexibility to offer infinite combinations of Production output and Fuel efficiency. On the other hand the larger cousin of the TH 76, the TH86 is a Tough ma-

chine which works where other don't due to strong construction and power modes. This machine is best suited for jobs where; guaranteed output is needed within a set time frame under rough operating conditions. We are confident that the above offering of Excavator Loaders shall be very well received by customers, because we have designed these machines; so as to address the key needs of our esteemed customers.
