

Tata Hitachi launches TH76 excavator loader

INDORE: Tata Hitachi launched TH76 excavator loader in Indore in the presence of senior company officials and customers. "The TH76 is rolling out of Tata Hitachi's plant in Dharwad, Karnataka, which is one of the first state-of-the art assembly line manufacturing facilities in India," a company release stated. Tata Hitachi formerly known as Telcon (originally a division of Tata Motors) has been in the forefront of the construction equipment business since the early 1960s. A technical collaboration with Hitachi Construction Machinery Limited (HCM), Japan started in 1984 for the manufacture of hydraulic excavators in India.
