## **TATA HITACHI LAUNCHES LATEST MOTOR GRADER**

Tata Hitachi Construction Machinery Company Limited launched the latest Motor Grader - TG160 at Hyderabad today. The Company aims to enhance the operational performance of its customers, thereby leading to improvement in their profitability and competitiveness by offering reliable solutions.

The product is equipped to deliver class leading Tractive Effort that helps grade in the toughest of conditions. Equipped with both Manual and Fully Automatic drive modes, it provides operator comfort in every grading situation, reduced tyre wear and higher overall productivity. This is further complimented by the widest tyres in its class as a standard fitment. It helps in reducing ground pressure and offers a superior grip. The TG160 incorporates Industry Trusted aggregates which makes up its drive train -- another superior value proposition from the Industry Leader Tata Hitachi

The company on this occasion also showcased products for the road sector namely the VM3 Soil compactor and the TH86 Backhoe loader. The VM3 soil compactor with the Industry leading Static Linear Load and Highest Vibration Amplitude guarantees superior compaction. Augmented by Standard Drum Drive and Automatic Drive mode the machine climbs every road in perfect operator comfort. The TH86 recognized as "The Tough One" is true to its name with a Power Shift Transmission and a powerful 86 hp engine to take on all that comes along the road. This product is extensively used in Quarries and Aggregate plants which form the backbone of the Road building industry.
