

Reliable solutions

## ZAXIS 650 H

*Designed for  
Mining Excellence*

### HYDRAULIC EXCAVATOR

Engine Rated Power : 295 kW (400 PS)

Operating Weight : Bachhoe : 58 340 kg  
Shovel : 60 500 kg

Bucket  
SAE, PCSA Heaped : Bachhoe : 3.3 m<sup>3</sup> - 3.8 m<sup>3</sup>  
Shovel : 3.0 m<sup>3</sup> - 4.0 m<sup>3</sup>

# Futuristic Performance

## High Productivity A Truly high performance machine

- 295 kw (400 ps) powerful engine.
- H/P mode newly used in this model.
- Backhoe sizes 3.8 m<sup>3</sup> [Standard] / 3.3 m<sup>3</sup> [Heavy duty version]  
Shovel Bucket Sizes of 3.0 m<sup>3</sup> / 3.3 m<sup>3</sup> / 4.0 m<sup>3</sup> available.
- Less fuel consumption during light-load operation from auto acceleration system.

## Lower Running Cost Stronger Structural Component Design

- Durable bucket joint
- Reinforced side steps.

## Lower Maintenance Cost Reduced Maintenance Time and Expense

- Convenient maintenance doors are provided in the engine cover for quick and easy inspections.
- Auto-grease lubricator and electric grease gun. (Optional)

## Rugged Pressurized cab with integrated headguard:

- Low noise and vibration in cab.
- Boom mode selector helps to control shock and vibration.
- Auto-control air conditioner.

# Improved Productivity & Faster Work Completion

## Large Displacement Engine Creates Power for High Productivity

- **Engine rated power:**  
295 kw (400PS)
- **Engine displacement:**  
15.68L

## Excavating Power for Tough Job Site

A power engine and efficient hydraulic system team up to boost maximum excavating power. It has the power to take on tough job site.

- **Bucket :**  
306 kN (32 900kgf)
- **Arm :**  
250kN (27 600kgf)

## Large Bucket Capacity Boosts Productivity

The ZAXIS650H has a bucket capacity that contributes to its productivity. It has been designed to resist wear. The rock bucket has lateral-type wear plates that are easy to replace.

### Backhoe Bucket

- 3.8 m<sup>3</sup> (G P)
- 3.3 m<sup>3</sup> (H D)

### Shovel Bucket

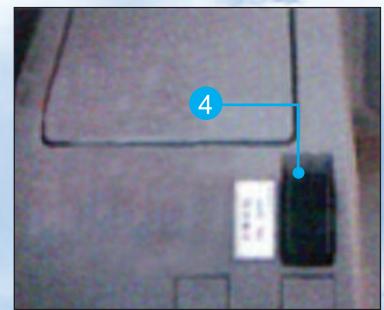

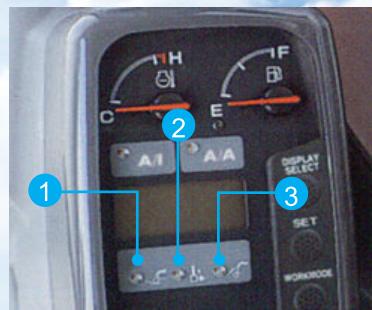

- 3.0 m<sup>3</sup>
- 3.3 m<sup>3</sup>
- 4.0 m<sup>3</sup>

## Travel Power and speed you can depend on

- **Travel Power :**  
415kN (42 300kgf)
- **Travel Speed :**  
0 – 5.0 km/h

**ZAXIS uses advanced technology to reduce cost while working faster.**

#### Work Modes for Increased Performance

The four work modes have been enhanced over prior models.

1. General purpose mode
2. Trench digging mode.
3. Attachment mode.
4. Precision mode.

# Minimum Effort Maximum Efficiency

The operator's compartment is designed for both comfort and operating efficiency.

## FOPS CAB

An ISO-standard FOPS large-size cab is used. It has an integrated overhead guard to help provide protection from falling objects. An optional guard is available for the front wind shield to make the cab OPG level II (ISO) Compliant.

*Fops: Falling Object Protective Structure*

*OPG: Operator Protective Guard*

Upper/Lower  
cab front guard (Option)

## Auto Control Air Conditioner

Simply set the temperature and forget about it . Ducts are positioned to promote even air flow throughout the cab.

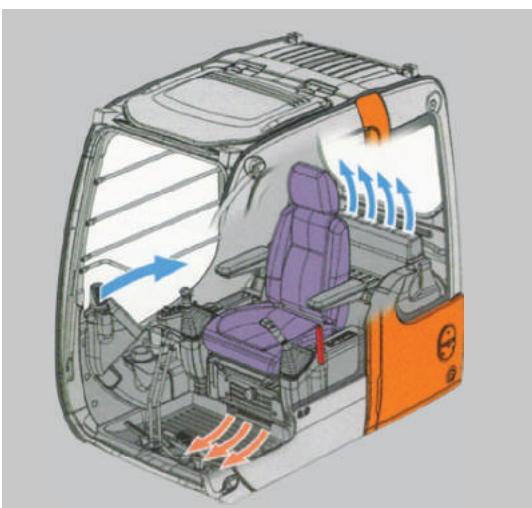

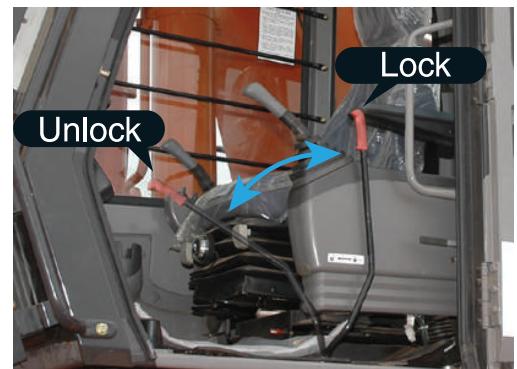

Illustration shows  
a sample of the air flow  
during bi-level control.

One-glance Monitor Panel

Well-positioned Switches

Pilot-Control Shut-off Lever

Emergency evacuation hammer

### Boom Mode Selector Helps to Reduce Shacking and Jerking of Body During Scraping Operations.

The amount the body can be lifted or pulled by the front of the machine can be **ON** or **OFF** selected. This helps to provide for more comfortable operation and contributes to longer component service life.

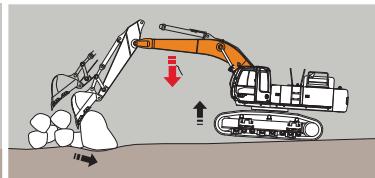

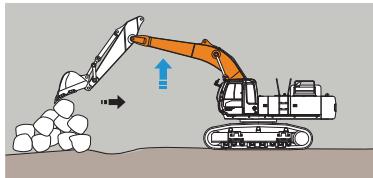

**ON** Comfortable mode

There is little lifting or pulling of the body so there is less vibration and shock.

**OFF** Powerful mode

Much lifting and pulling of the body so there is more vibration and shock.

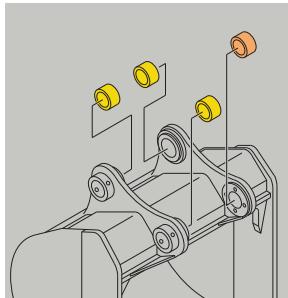

# Functional & Durable

Extensive steps have been taken to support basic performance and overall durability.

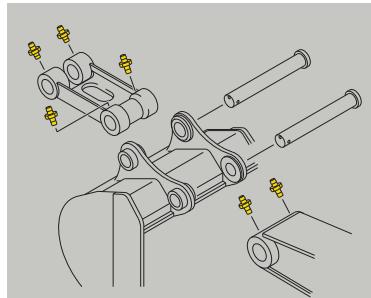

## Durable Bucket Joint

A new design is adopted to bucket joints. Bucket pins are solid and large, and lubricated through bosses for more durability. The use of bucket bushes reduces pin wear.

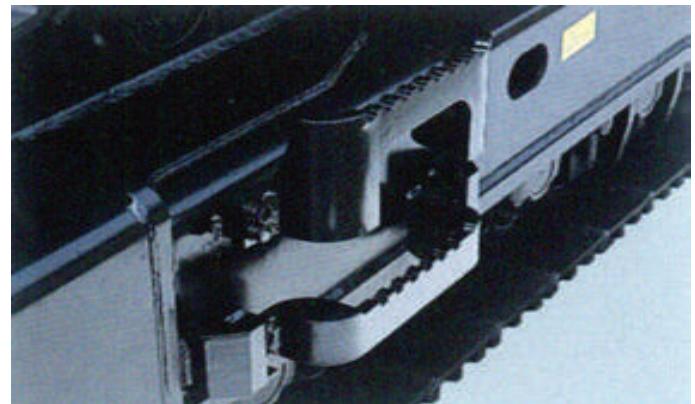

- Bucket bushings

- Boss lubrication to bucket pins

## Reinforced Side Steps

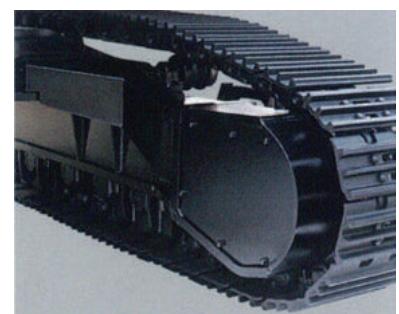

## Rugged Undercarriage for Withstanding Tough Jobs

A reshaped box design with X-Beams help disperse stress. This design boosts the overall rigidity of the entire undercarriage.

## Travel device Resists Damage

A compact travel device reduces the potential for damage.

# Smart Saving

Advanced technology helps reduce maintenance.

## Engine Maintenance Doors

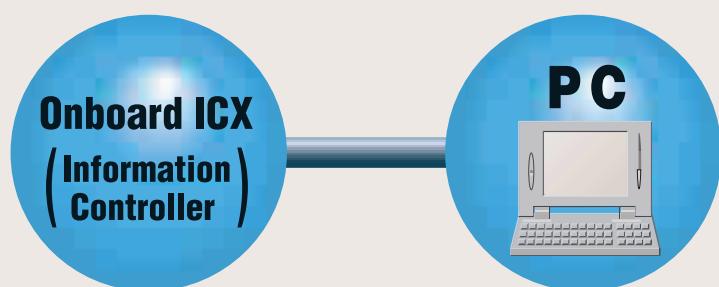

This small maintenance doors are added to the full engine cover. Just open the small maintenance door for easy , quick inspection and maintenance. No need to open the entire cover.

## Handy Utility Space

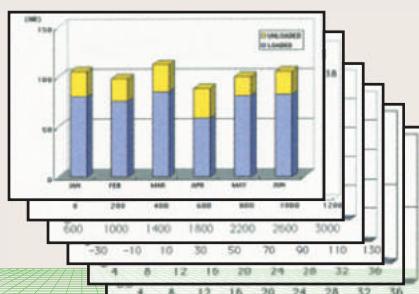

## ■ Equipment Operation Status Report

### Information Services for Equipment

- Operation record
- Error record
- Alarm record
- Frequency distribution  
Radiator coolant/hydraulic temperature etc.  
and others.

## Information Technology Support

Providing the data  
for making  
the right decisions.

## Environmentally Friendly Design

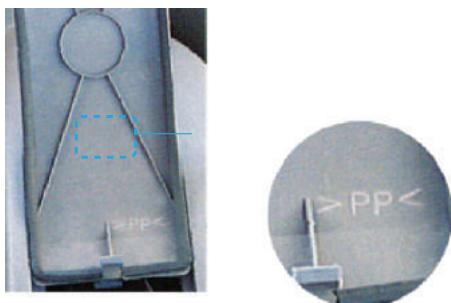

Helping ensure a cleaner tomorrow.

### Emissions Control Engine

Conforms to U.S. EPA Tier 2 and EC Stage II emission regulations.

### Anti Slip pads Reinforced arm dual type track guard bigger bucket

### Labeled Plastic Parts Facilitate Efficient Recycling

Note: The photo shows a cover opened at time of the inspection. Be sure to close a cover at the time of the operation.

| Maximum oil flow ..... | 30 L/min    |

### Hydraulic Motors

|              |  |
|--------------|--|
| Travel ..... | 2 axial piston motors with parking brake |
| Swing .....  | 2 axial piston motors                    |

### Relief Valve Settings

|                         |          |
|-------------------------|----------|
| Implement circuit ..... | 30.9 MPa |
| Swing circuit .....     | 29.4 MPa |
| Travel circuit .....    | 34.3 MPa |
| Pilot circuit .....     | 3.9 MPa  |

### Hydraulic Filters

Hydraulic circuits use high-quality hydraulic filters. A suction filter is incorporated in the suction line, and full-flow filters in the return line and swing/ travel motor drain lines.

## CONTROLS

Pilot controls. Hitachi's original shockless valve and quick warm-up system built in the pilot circuit. Hydraulic warm-up control system for hydraulic oil.

|                                 |   |
|---------------------------------|---|
| Implement levers .....          | 2 |
| Travel levers with pedals ..... | 2 |

## WEIGHTS AND GROUND PRESSURE

### Backhoe

Equipped with 6.6 m Boom, 2.9 m Arm and 3.8 m<sup>3</sup> (SAE, PCSA heaped) General Purpose Bucket

| Shoe type      | Shoe width | Operating weight | Ground pressure          |
|----------------|------------|------------------|--------------------------|
| Triple grouser | 600 mm     | 58 340 kg        | 1.04 kgf/cm <sup>2</sup> |

### Shovel

Equipped with Loading Shovel Attachment and 3.5 m<sup>3</sup> (SAE, PCSA heaped) Bottom Dump Bucket

| Shoe type      | Shoe width | Operating weight | Ground pressure          |
|----------------|------------|------------------|--------------------------|
| Triple grouser | 600 mm     | 60 500 kg        | 1.09 kgf/cm <sup>2</sup> |

## UPPERSTRUCTURE

### Revolving Frame

Welded, sturdy box construction, using heavy-gauge steel plates for ruggedness. D-section frame for resistance to deformation.

### Swing Mechanism

Axial piston motor with planetary gear is bathed in oil. Swing circle is single-row, shear type ball bearing with induction-hardened internal gear. Internal gear and pinion gear are immersed in lubricant. Swing parking brake is spring-set/hydraulic-released disc type. Swing cushion valve built in swing motor absorbs shocks when stopping swing.

Swing speed .....

7.0 min<sup>-1</sup> (rpm)

### Operator's Cab

Independent, spacious cab, 1 005 mm wide by 1 820 mm high, conforming to ISO\* Standards. Reinforced glass windows on 4 sides for visibility. Openable front windows (upper and lower). Adjustable, reclining seat with armrests; movable with or without control levers and monitor panel.

\* International Standard Organisation

## UNDERCARRIAGE

### Tracks

Tractor-type undercarriage. Welded track frame, using carefully selected materials for tough jobs. Side frame bolted to track frame. Lubricated track rollers, idlers, and sprockets with floating seals. Track shoes with triple grouser made of induction-hardened rolled alloy. Heat-treated connecting pins with dirt seals. Hydraulic (grease) tra3.83.8ck adjusters with shock-absorbing recoil springs.

|  |                         |
|--|-------------------------|
| Upper rollers .....                    | 3                       |
| Lower rollers .....                    | 8                       |
| Track shoes .....                      | 48                      |
| Track guard .....                      | 2                       |
| H-track center guard (dual type) ..... | 1                       |
| Ground Pressure.....                   | 1.04kgf/cm <sup>2</sup> |

### Traction Device

Each track driven by axial piston motor through reduction gears for counter-rotation of the tracks. Sprockets are replaceable. Parking brake is spring-set/hydraulic-released disc type. Travel shockless relief valve built in travel motor absorbs shocks when stopping travel, ensuring smooth stops.

|                              |   |
|------------------------------|---|
| Travel speeds .....          | High: 0 to 5.0 km/h<br>Low: 0 to 3.5 km/h |
| Maximum traction force ..... | 415kN (42 300 kgf)                        |
| Gradeability .....           | 35° (70%) continuous                      |

## SERVICE REFILL CAPACITIES

|                                       | liters |
|---------------------------------------|--------|
| Fuel tank .....                       | 740    |
| Engine coolant .....                  | 98     |
| Engine oil .....                      | 55     |
| Pump drive .....                      | 7      |
| Swing mechanism (each side) .....     | 10.5   |
| Travel final device (each side) ..... | 14     |
| Hydraulic system .....                | 618    |
| Hydraulic tank .....                  | 310    |

# SPECIFICATIONS

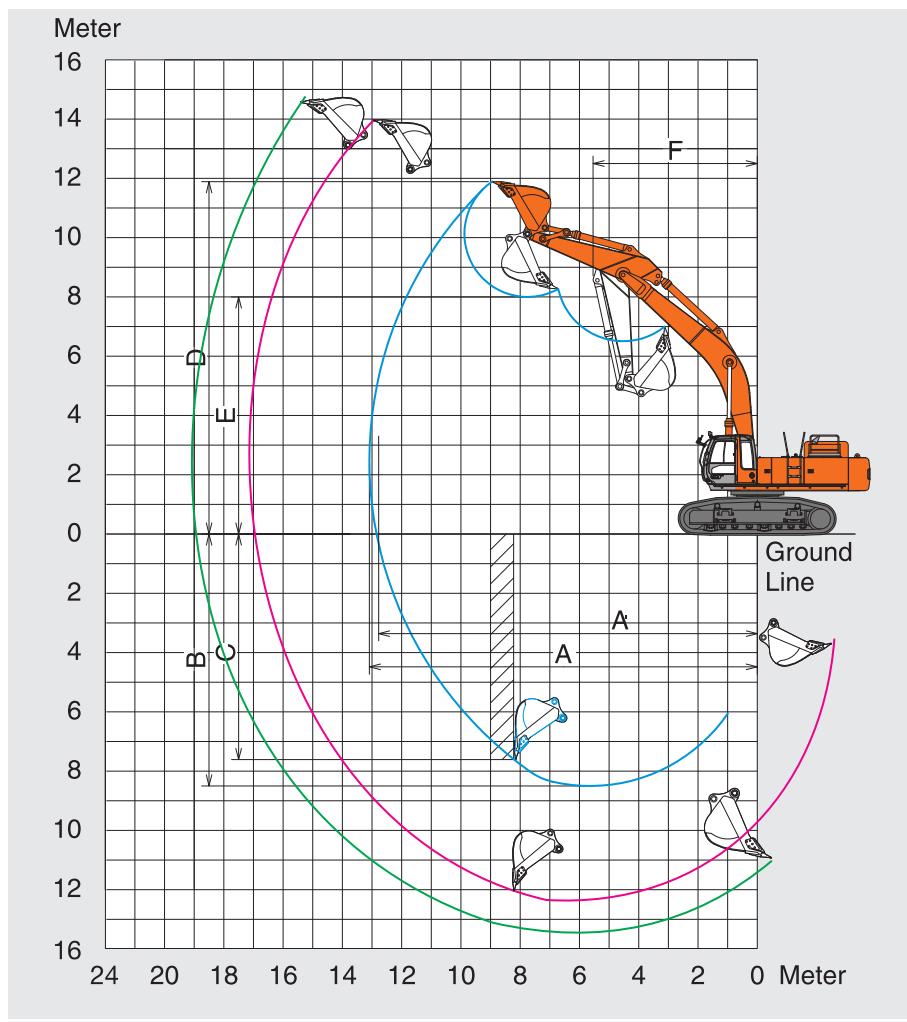

## BACKHOE ATTACHMENT

Boom and arms of all-welded, box-section design. Bucket is all welded, high-strength steel structure. Side clearance adjust mechanism provided on the bucket joint bracket.

Unit: 1 000 kg

1.14\* 1.84\*

\* Load Height at max reach=2.4 m;  
Load Radius at max reach=15.7 m

Notes: 1. Ratings are based on SAE J1097.

2. Lifting capacity of the ZAXIS Series does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.

3. The load point is a hook (not standard equipment) located on the back of the bucket.

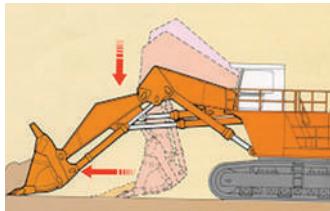

4. \*Indicates load limited by hydraulic capacity.

5. Figures in shaded area are with heavy - lifting system.

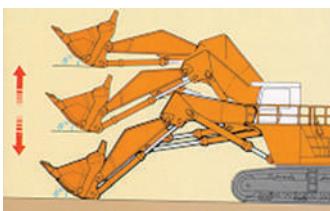

6. Loads mentioned in 1000 kg

## LOADER ATTACHMENT

Auto-Leveling Crowd Mechanism

Auto Bucket level raise system

### Patented Auto Level Crowd Mechanism

TATA Hitachi's unique patented auto level crowd mechanism on the ZX650H shovel version gives exceptional job efficiency, loading capability and operating ease. The level crowding operations are greatly simplified with just one control lever needed, the result is dramatically shorter cycle time and greatly increased productivity. This design also enables the crowd force to become strongest around the maximum reach point where the force is most required.

The parallel link mechanism keeps the bucket digging angle constant, and level cylinder circuit maintains the bucket height constant. Due to this feature the need for additional clean-up equipment is also eliminated as it ensures a level mine floor contributing to increased tyre life of the haul equipment. It also facilitates Auto-Bucket level raise avoiding spillage of the material apart from contributing greatly to the increased productivity. Patents registered in USA, Germany and Japan.

### Working Ranges

|    |                                       |        |
|----|---------------------------------------|--------|
|    | Boom Length                           | 4 300  |
|    | Arm Length                            | 3 300  |
| A  | min. Digging reach                    | 3 794  |
| B  | min. Level crowding distance          | 5 487  |
| C  | Level crowding distance               | 3 302  |
| D  | max. Digging reach                    | 9 216  |
| E  | max. Cutting height                   | 10 147 |
| E' | max. Dumping height                   | 7 388  |
| F  | max. Digging depth                    | 4 602  |
| G  | Working Radius at max. Dumping Height | 4 768  |
| H  | max. Bucket Opening Width             | 1 420  |

All dimension are in mm

Arm Crowding Force (kgf)\*

38 140

Bucket Breakout Force (kgf)\*

38 600

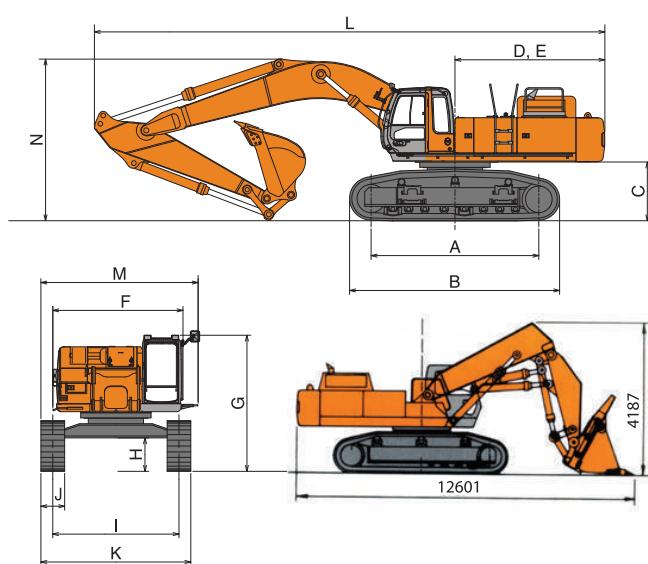

\* As per ISO standards.
