

We are pleased to announce the launch of our newly developed **TL340H Prime**, the CEV-IV compliant wheel loader.

TL340H Prime - Your Best Business Partner

TL340H Prime has been designed and developed after considering the changing customer requirements. The machine has undergone rigorous testing to perform under various site conditions such as blue metal crusher, limestone, coal, and iron ore. The machine delivers high power suitable for all types of tough applications keeping the fuel consumption at lower levels. TL340H Prime is highly fuel efficient and it consumes 20-40% lesser fuel compared to other traditional hydrodynamic wheel loaders.
