TAKE PRODUCTIVITY TO THE NEXT LEVEL.

TACKLE TOUGH JOBS.

The EX2600-6 is built for major production. A fuel-efficient, Cummins QSKTA50-CE engine provides powerful performance with an Engine-Pump Control (E-P Control) system that efficiently adjusts power to your load demand. The advanced hydraulic system tops the industry for smooth, efficient combined operations of the front attachment and swing, delivering quick cycle times. This system, combined with the Hitachi-patented auto-leveling mechanism and large bucket capacities, contributes to efficient production. The EX2600-6 pairs well with the EH1700-3 and EH3500AC-3 trucks and is available in a backhoe or front-shovel configuration. Add the EX2600-6 to your fleet, and you get...

RELIABLE PERFORMANCE.

■ Powerful Engine.

A Cummins QSKTA50-CE diesel engine meets U.S. EPA Tier 2 emission regulations.

■ Efficient E-P Control.

The computer-aided Engine-Pump Control (E-P Control) system senses load demand and adjusts power to the work being performed.

■ Large, Efficient Bucket.

The large bucket is shaped specifically to enhance digging and loading operations. Its sharp tilt angle helps boost operating efficiency by allowing the operator better use of the bucket digging forces, and after digging, keeping more of the material in the bucket while loading the haul truck.

■ Auto-Level Mechanism.

An exclusive Hitachi feature available on front shovel attachments, the one-lever leveling control boosts productivity through efficient operation of the bucket through the dig cycle.

DURABILITY BUILT IN. DOWNTIME TOSSED OUT.

DEPENDABLE STRENGTH.

The EX2600-6 is designed and built with strength you can count on. Toughness is built-in with the rigid box design and integrated cast steel structures into the center track frame. High-mounted travel motors are guarded against rock damage, and a strategically positioned oil cooler is designed to give you more uptime. Add it all up, and the EX2600-6 is...

EFFICIENT AND TOUGH.

■ The rigid box design resists bending and twisting forces, giving you stability and strength on any job.

■ High-mounted compact travel motors are protected from rock damage. Optional travel motor guards provide an even higher level of protection from damage.

■ The cast steel structures, integrated into the center track frame, assist in avoiding stress concentration and increase reliability.

■ The oil cooler is strategically positioned far from the engine radiator for even better cooling potential.

DURABILITY

■ The sturdy cab protects operators from falling objects. The cab's top guard meets OPG Level II (ISO) standards. The entire cab sits on a package of fluid-filled elastic mounts that absorb vibration for a more comfortable ride.

■ The 6.4-meter (21 ft.) high, forward-sloping cab provides a clear view of the work site – even when loading trucks.

■ The air suspension, multi-position seat can be customized to the operator's needs and adjusted according to operator weight.

■ The well-insulated, pressurized cab keeps out dust and is air conditioned.

MORE COMFORT, MORE PRODUCTIVITY.

COMFORTABLE AND SAFE CAB.

The EX2600-6 cab is designed to keep operators as comfortable, efficient and productive as possible. The well-insulated, pressurized cab keeps dust out while maintaining a comfortable temperature thanks to a highly efficient heating/air conditioning system. Operators of all sizes have plenty of legroom and storage space with the cab's ergonomic design, which helps operators stay productive even on long work shifts. With the EX2600-6, you get...

COMFORTABLE PRODUCTION.

■ Electric joystick control levers provide precise and almost effortless operation.

■ The multi-display, color LCD monitor provides machine data, operating status and alerts at a glance. The monitor can be preset to indicate replacement intervals for engine oil, hydraulic oil and filters.

■ Four optional outside cameras can be mounted around the machine for enhanced visibility and help eliminate blind spots.

MORE UPTIME, LESS MAINTENANCE.

LOWER OPERATING COSTS.

When it comes to maintenance, the EX2600-6 provides big advantages. The simple servicing, inspection and cleaning of the EX2600-6 reduces costs and allows you to focus on finishing jobs. This excavator features easy-to-check sight gauges and fluid reservoirs, quick-change remote-mounted filters, advanced self-diagnostics and extended filter replacement intervals. When you're operating an EX2600-6, you save time and money due to...

MINIMIZED MAINTENANCE.

■ Folding stairs with wide steps allow for easy accessibility, servicing and maintenance.

■ The centralized filter system makes inspection and maintenance quicker and more convenient.

■ A contamination sensor alerts the operator before it's too late of accumulated contaminants in the oil that could cause damage.

■ A walkway around the entire counterweight provides easy access to rear areas for faster, safer inspections and maintenance.

MAINTENANCE

■ Located at the center of the machine, a wide-open service area gives you access to the engine as well as hydraulic and electrical systems.

■ The compartment floor slides down to lower a grease drum can for quick replacement.

■ An ejector automatically expels dust from the air cleaner, giving you one less maintenance task.

■ The auto-lubrication system for the front joint pins and swing circle saves you time.
